## *Export to PDF Documentation*

March 2017

Both teachers and students can export notebook pages to PDF format. It is only possible to export a PDF of the pages that are currently loaded..

1. Open a notebook, or particular pages or a session.
2. Tap on the **CLP icon** in the top left corner.
3. With **Export** selected on the left menu bar, tap one of the options pictured below:
  - a. **Convert Notebook Pages** (that are currently loaded)
  - b. **Convert Submissions for this Page** (for the currently selected page)
  - c. **Convert All Submissions** (of all the notebook pages currently loaded)

Exported notebooks appear in a folder on the Desktop called **Notebooks - PDF**.

Files are named in this format: [notebook name], [user name], [page range], [date time]
